

# MATERIAL INSANITY

February 26 – August 15, 2019

Curator:

Meriem Berrada & Janine Dieudji, MACAAL

Scenography:

Zineb Andress Arraki

Bringing together more than 30 artists from the continent and its diaspora, *Material Insanity* explores matter and its symbolic significance, in a plurality of dimensions and formal experiences. Through installations made from everyday objects or materials, the exhibition intersects various discourses in the service of a new aesthetic.

Through an immersive scenography created by architect and artist Zineb Andress Arraki, the works in the *Material Insanity* exhibition question the relationship between form and meaning, while sublimating the potential of the medium itself.
